Dear Manager,

I am writing in reference to the position available related to below skill set.

I have been working with QA InfoTech Pvt. Ltd. for 4 years and 5 months, and have found the experience very rewarding. I have worked on various Automation and Development projects along with hands-on experience in Data Science And Analytics. I have worked for one of our critical projects which had astringent delivery timelines. I possess strong skill set that include: Test Automation and Development using Selenium WebDriver, Java, Python, C#, Sikuli, White, TestNG, behave, Cucumber, Maven, NUnit, Subversion (SVN), Git, SourceTree, Jenkins, JIRA, Visual Studio, Automated Security Assessment for web applications with OWASP ZAP and Web development using Python Flask framework, Java, JavaScript, Requests, Hands-on experience with AWS, Amazon EC2 machines, RedHat servers, Amazon RedShift and SnowFlake, Eclipse, NetBeans, PyDev, Windows and Linux which is suitable for the required position. In my previous project, I have successfully delivered the required product though it was a completely naïve area for me.

I believe that I am an excellent candidate for the position you have available, and would very much like the opportunity to meet you and discuss what I must offer at your organization.

Sincerely Yours,
Sarvesh Shrivastava.
